

Justin Oudijk

Cybersecurity & IT Professional
Kennesaw, GA 30152 | [linkedin.com/in/justin-oudijk](https://www.linkedin.com/in/justin-oudijk)

PROFESSIONAL SUMMARY

Dedicated IT professional with a Master of Science in Information Technology and a Graduate Certificate in IT Security. I possess over seven years of combined professional and technical experience spanning cybersecurity operations, systems hardening, network monitoring, and security engineering. My approach is grounded in the belief that effective security must be both technically sound and understandable, and I take pride in translating complex technical challenges into clear, actionable plans for both technical and non-technical stakeholders alike. I intend to bring this combination of hands-on experience, operational mindset, and clear communication to your organization.

WORK EXPERIENCE

Graduate Research Assistant

June 2025 - May 2026

Kennesaw State University | Kennesaw, GA

- Conducted cybersecurity research on Generative AI as a threat multiplier across IT and OT systems, identifying attack patterns mapped to the Cyber Kill Chain and evaluating mitigations using NIST SP 800-53, NIST AI RMF, MITRE ATT&CK, and IEC 62443.
- Performed threat modeling, security event analysis, and vulnerability assessment of enterprise and industrial systems, supporting risk identification and recommending controls aligned with operational security requirements.
- Authored three cybersecurity research papers focused on incident response challenges, security monitoring gaps, and digital forensics considerations in modern enterprise environments.

Security Engineer Intern

September 2023 - January 2024

Shock Media B.V. | Almelo, Netherlands

- Supported security monitoring and incident detection by engineering XML-based detection rules and centralized log ingestion using rsyslog and ELK Stack SIEM, improving security visibility across enterprise systems, reducing mean time to detect (MTTD) for security incidents.
- Integrated endpoint security telemetry into SIEM alerting workflows, supported firewall and authentication controls, and assisted with system hardening across Windows and Linux systems aligned with ISO 9001, 27001, 27002, NEN7510, GDPR, and identity and access management concepts.
- Supported security operations including alert triage, incident detection support, vulnerability remediation, and intrusion monitoring using IDS tools and log analysis to strengthen response workflows.

Cybersecurity Engineer & Founder

February 2023 - July 2023

WinSecure | Zwolle, Netherlands

- Co-founded and led a six-person cybersecurity consultancy delivering security assessments and incident readiness engagements for SMB and government clients from scoping through execution.
- Developed incident response playbooks, disaster recovery plans, and security assessment frameworks based on CIS Controls, NIST SP 800-53, ISO 9001, ISO 27001, ISO 27002, GDPR, and PCI-DSS standards.
- Performed vulnerability assessments, risk analysis, and security control reviews, translating findings into prioritized remediation actions to reduce exposure across client environments.

IT Event Staff Member

November 2022 - July 2023

Windesheim University of Applied Sciences | Zwolle, Netherlands

- Delivered cybersecurity awareness training covering phishing, spoofing, social engineering, and user security hygiene to non-technical audiences, improving end-user security awareness and safe computing practices.
- Supported recruitment and outreach for the IT Infrastructure Design and Security program, serving as a primary student contact for prospective students and explaining cybersecurity career pathways.
- Assisted with technical instruction and mentored student groups on IT and security-focused academic projects.

Technical Support Intern

December 2018 - July 2019

Municipality of Hengelo | Hengelo, Netherlands

- Supported enterprise-wide migration of more than 1,000 endpoints from Windows 7 to Windows 10, providing first and second-line support during a large-scale rollout in a multi-user environment.
- Assisted with Active Directory administration, VMware infrastructure support, and deployment of wireless access points during office relocation, contributing to system availability and operational continuity.
- Performed network and risk analysis tasks to identify operational and security improvements within the enterprise IT infrastructure.

Computer Repair Technician

January 2017 - June 2017

GSM Fan | Hengelo, Netherlands

- Diagnosed and resolved hardware, software, and operating system issues across desktops, laptops, mobile devices, and Apple (iOS) products, including malware removal, system recovery, and end-user technical support.

EDUCATION

Master of Science in Information Technology <i>Kennesaw State University Kennesaw, GA Graduate Certificate in IT Security</i>	May 2026
Bachelor of Science in IT Infrastructure Design & Security <i>Windesheim University of Applied Sciences Zwolle, Netherlands</i>	January 2024
Associate of Science in IT Management (NLQF4) <i>ROC van Twente Hengelo, Netherlands</i>	July 2019
Associate of Science in Information Technology (NLQF3) <i>ROC van Twente Hengelo, Netherlands</i>	July 2017

HIGHLIGHTED PROJECTS

Cybersecurity Self-Assessment Framework Designed and delivered a Phase 1 Purple Team self-assessment framework for a nonprofit government agency, simulating known threat behaviors against EDR/XDR solutions. Produced incident response playbooks, assessment documentation, and a roadmap for statewide deployment.	Spring 2026
Real-Time IoT Sensor Data Security Developed a Python-based system for real-time IoT sensor data ingestion and visualization, implementing encryption and secure transmission controls to protect data integrity and confidentiality across networked devices.	Spring 2025
Security of Healthcare Data in Multi-Cloud Environments Co-authored research analyzing multi-cloud security risks in healthcare environments across AWS, Azure, and Google Cloud, mapping threats to the CIA triad. Proposed a unified identity and access management framework, zero-trust architecture, and blockchain-based audit logging aligned with HIPAA, HITECH, and GDPR.	Fall 2024
BIPSA: Blended Intensive Programme Security Awareness Participated in an international cybersecurity awareness program in St. Pölten, Austria, designing and prototyping an interactive security awareness training game focused on phishing and social engineering scenarios.	Spring 2023
VitalSec: Vital Infrastructure Security - Led security research on critical infrastructure within the Dutch energy sector, evaluating IT and OT security practices through industry engagement and technical analysis. - Developed a disaster recovery plan, deployed a proof-of-concept SIEM/SOC environment, conducted penetration testing, and performed digital forensic analysis across multiple systems. - Created and deployed security awareness materials for healthcare personnel at Isala to promote cybersecurity resilience and hygiene.	Fall 2022

CERTIFICATIONS

ISC² Certified in Cybersecurity (CC) - Credential ID: 1516438	April 2024
Google Cybersecurity Certificate - Credential ID: ZQKD7AD3BNWT	January 2024
CompTIA Security+ (In Progress, exam scheduled)	Expected 2026
CompTIA Network+ (In Progress, exam scheduled)	Expected 2026

TECHNICAL SKILLS

Security Operations & Incident Response: Incident detection & response, security event monitoring, threat analysis, vulnerability management, risk assessment, log analysis, attack surface analysis, alert triage, incident response support, disaster recovery, security incident handling.

Tools & Platforms: Splunk, ELK Stack, Wazuh, Snort, Suricata, Zeek, Wireshark, Volatility, Autopsy, FTK Imager, Nmap, Nessus, Metasploit.

Systems & Network Infrastructure: Windows Server & Windows 10/11, Linux (Ubuntu, Debian, Kali), Active Directory, identity & access management (MFA, RBAC), system hardening, patch management, antivirus, virtualization (VMware, VirtualBox), containerization (Docker, Kubernetes), TCP/IP networking, pfSense, network access control (NAC), network monitoring, network security architecture.

Cloud & Compliance: Microsoft Azure (Fundamentals), identity and access management (IAM, RBAC) concepts through coursework and virtual lab environments, cloud computing fundamentals, NIST SP 800-53, MITRE ATT&CK, CIS Controls, ISO 9001/27001/27002, ITIL, GDPR, HIPAA.

Programming & Automation: Python, PowerShell, Bash, SQL.

Professional Skills: Communication, documentation, presentation, teamwork, leadership, stakeholder communication, user support, multitasking, time management, workload prioritization, problem solving.

LEADERSHIP

President & Vice President, KSU Association of IT Professionals <i>Kennesaw State University</i> Led an organization of more than 140 IT students as President, organizing technical events, guest speaker sessions, and cybersecurity competitions while coordinating with faculty and industry partners to support professional development and member engagement.	April 2024 - May 2026
