

Justin Oudijk

Systems & Cybersecurity Operations Engineer
Kennesaw, GA 30152 | [linkedin.com/in/justin-oudijk](https://www.linkedin.com/in/justin-oudijk)
U.S. Permanent Resident - No Sponsorship Required

PROFESSIONAL SUMMARY

Results-driven engineer with an MS in Information Technology and proven experience managing enterprise IT support, SOC monitoring, and alert triage operations. Expert at translating complex technical incidents into clear, actionable solutions for stakeholders. Combines deep technical engineering (SIEM, Active Directory, Network Hardening) with strong client-facing communication to resolve high-pressure technical challenges.

WORK EXPERIENCE

Graduate Research Assistant

June 2025 - May 2026

Kennesaw State University | Kennesaw, GA

- Mitigated emerging AI infrastructure risks by dissecting weaponized Generative AI mechanisms as threat multipliers across IT/OT environments, mapping complex attack vectors directly to Cyber Kill Chain and MITRE ATT&CK frameworks.
- Identified architectural defensive blind spots by deconstructing critical industrial control systems through rigorous threat modeling and root-cause analysis to document core security requirements aligned with NIST standards.
- Resolved critical knowledge gaps in automated threat defense by authoring three comprehensive academic manuscripts detailing modern incident response limitations, digital forensics vulnerabilities, and machine learning risks.

Security Engineer Intern

September 2023 - January 2024

Shock Media B.V. | Almelo, Netherlands

- Accelerated incident response capabilities by redesigning Security Operations Center (SOC) workflows for alert triage and intrusion monitoring, rapidly isolating critical threats and driving down the company's mean time to detect (MTTD).
- Significantly reduced alert fatigue and network visibility gaps across enterprise systems by deploying centralized log ingestion via an ELK Stack SIEM and writing custom XML-based detection rules that slashed false alarms.
- Secured corporate infrastructure against unauthorized access by integrating endpoint telemetry into automated alerting workflows and managing firewall and identity and access management (IAM) controls to meet strict ISO standards.

Cybersecurity Engineer & Co-Founder

February 2023 - July 2023

WinSecure | Zwolle, Netherlands

- Built and scaled a cybersecurity consultancy from the ground up, establishing operational frameworks and leading a six-person engineering team to deliver end-to-end security assessments, vulnerability management, and incident readiness for SMB and government clients.
- Designed custom security frameworks and incident response playbooks from scratch, successfully minimizing client risk exposure and compliance friction by aligning their defenses with CIS Controls, NIST SP 800-53, and PCI-DSS standards.
- Drove business growth and stakeholder trust by converting complex technical vulnerability data into strategic, prioritized, client-facing remediation roadmaps that non-technical executives could instantly act upon.

Cybersecurity Workshop Instructor

November 2022 - July 2023

Windesheim University of Applied Sciences | Zwolle, Netherlands

- Designed and led interactive offensive security labs at the Makersfestival, instructing diverse audiences on email hacking and spoofing methodologies using Kali Linux, PuTTY, and live SMTP command injections.
- Explained complex core infrastructure concepts to incoming students and community members, delivering technical walkthroughs on hardware devices, network architecture, and security operations pathways.
- Streamlined student training and project execution by providing direct technical instruction and troubleshooting support to student cohorts managing infrastructure and security engineering projects.

Technical Support Intern

December 2018 - July 2019

Municipality of Hengelo | Hengelo, Netherlands

- Successfully completed a massive enterprise-wide modernization by orchestrating the migration of 1,000+ endpoints from Windows 7 to Windows 10, providing rapid Tier 1 and Tier 2 support in a high-volume, multi-user environment.
- Maintained operational continuity and identity integrity across government systems by administering Active Directory environments, supporting VMware virtual infrastructure, and deploying wireless access points.
- Optimized infrastructure efficiency by conducting proactive network and risk analyses to locate bottlenecks.

Computer Repair Technician

January 2017 - June 2017

GSM Fan | Hengelo, Netherlands

- Diagnosed and resolved hardware and software issues across desktops, laptops, and mobile devices, performing malware removal, system recovery, and direct end-user technical support.

EDUCATION

Master of Science in Information Technology <i>Kennesaw State University Kennesaw, GA</i> <i>GPA: 4.0 Summa Cum Laude Specialization: Graduate Certificate in Information Security</i>	May 2026
Bachelor of Science in IT Infrastructure Design & Security <i>Windesheim (Accredited B.S. Equivalent) Zwolle, Netherlands</i>	January 2024
Associate of Science in Information Technology Management <i>ROC van Twente (Technical College) Hengelo, Netherlands</i>	June 2019
Associate of Science in Information Technology <i>ROC van Twente (Technical College) Hengelo, Netherlands</i>	June 2017

HIGHLIGHTED PROJECTS

Cybersecurity Self-Assessment Framework - Strengthened defenses for a nonprofit government agency by designing a Phase 1 Purple Team self-assessment framework that simulated real-world cyber threat behaviors against EDR/XDR solutions. - Advanced incident readiness and compliance blueprints by producing operational incident response playbooks, assessment documentation, and a scalable roadmap for statewide deployment.	Spring 2026
Real-Time IoT Sensor Data Security Secured edge computing infrastructure against data interception by engineering a Python-based system for real-time IoT sensor data ingestion, transmission encryption, and secure visualization workflows.	Spring 2025
Security of Healthcare Data in Multi-Cloud Environments - Mitigated enterprise vulnerabilities across AWS, Azure, and Google Cloud by analyzing multi-cloud security risks, mapping threats to the CIA triad, and designing a unified identity and access management (IAM) framework. - Reworked compliance frameworks for high-risk data by designing a zero-trust architecture with extended blockchain-based audit logging.	Fall 2024
BIPSA: Blended Intensive Program Security Awareness Designed and prototyped an interactive security awareness training game in Austria, delivering hands-on phishing and social engineering education to students aged 12-16.	Spring 2023
VitalSec: Vital Infrastructure Security - Identified and mitigated security gaps in the Dutch energy sector by executing deep-dive IT and OT security evaluations, penetration testing, and digital forensic analysis across multiple legacy systems. - Designed resilient disaster recovery protocols and deployed a fully functional proof-of-concept SIEM/SOC environment to ensure operational continuity against automated infrastructure attacks.	Fall 2022

CERTIFICATIONS

ISC² Certified in Cybersecurity (CC) - Credential ID: 1516438	April 2024
Google Cybersecurity Certificate - Credential ID: ZQKD7AD3BNWT	January 2024

TECHNICAL SKILLS

Core Security: Alert Triage, Incident Response, Vulnerability Management, Log Analysis, Threat Analysis, Root Cause Analysis. Security Tools: Splunk, ELK Stack, Wazuh, EDR/XDR, Snort, Suricata, Zeek, Wireshark, Nmap, Nessus, Metasploit, Volatility, Autopsy, rsyslog Systems & Identity: Windows Server, Windows 10/11, Linux (Ubuntu, Debian, Kali), Active Directory, Group Policy (GPO), Virtualization. Access & Hardening: Identity & Access Management (IAM), MFA, RBAC, System Hardening, Patch Management, Firewall Administration. Cloud & Frameworks: Microsoft Azure, NIST SP 800-53, MITRE ATT&CK, Cyber Kill Chain, CIS Controls, ISO 27001, ITIL, GDPR, HIPAA. Automation & Code: Python, PowerShell, Bash, SQL, Applied AI/ML Concepts.

LEADERSHIP

President & Vice President, KSU Association of IT Professionals <i>Kennesaw State University</i> - Directed an organization of 140+ IT students, led technical workshops, and hosted industry guest speaker events and school hackathons. - Built strategic partnerships with faculty and tech executives to drive professional development and member engagement.	April 2024 - May 2026
